Vermicomposting bin for Croft-

The following design ideas will be incorporated to create a **plastic vermicomposting bin**

Malia 4th

Sandy 4th

We wanted to use a plastic bin, and go outside to hunt for worms, after the rain there are usually a bunch of them. Worms like cool dark places so we would fill the bin with dirt and food scraps mixed together like a compost.

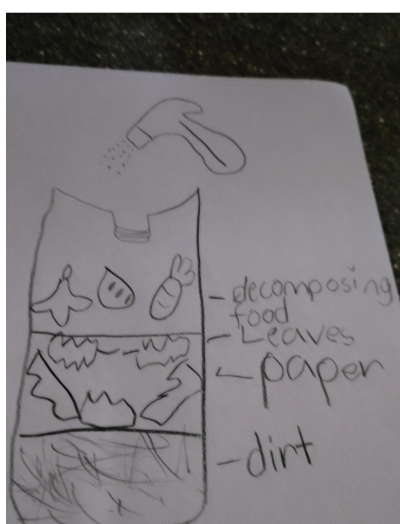

Cost of the bin would be around 10-15 dollars

Dirt and hunted worms = free

Food scraps = free

Shredded paper= 2 dollars (we get the Sunday paper) **Darwin 3rd grade**

Spray paint for the bin 5 dollars

Keller 3rd grade

Bedding for Vermicompost bin at Croft :

Newspaper & shredded paper from the classroom recycle bins
