

ON CAMPUS HEALTH SCREENING

Staff and students will be screened daily to ensure the safety of all participants, students and staff. Upon arrival students will receive a temperature check while remaining in the vehicle and asked to answer the symptom questionnaire listed below. Note, if students are carpooling, the driver must be able to answer questions for all students in the car in order for them to participate each day. Students must be fever free (below 99.0) to exit the car. Drivers may be asked to move to a second screening station to complete the screening process. You should anticipate you will be contacted immediately (1) if your student manifests symptoms or (2) your student's learning pod has had close contact with someone who has tested positive for Covid.

Questionnaire:

Has any child you are dropping off or anyone in the household had close contact in the last 14 days with someone diagnosed with Covid -19? Have you been asked to quarantine?

Does any child you are dropping off or anyone in the house have any of the following symptoms?

- Fever or chills
- Sore throat
- Shortness of breath or difficulty breathing
- Cough
- Headache
- Loss of taste or smell
- Diarrhea
